

PEACOPOXY MULTI-PURPOSE PRIMER

- Used as universal primer on blasted steel, non-ferrous metal and galvanized steel
- Used as single coat on hot-dipped galvanized steel, substitute etch primer and epoxy primer
- Excellent anti-corrosion properties
- Fast drying, can be handled within an hour
- Very good compatible to all kinds of coating; epoxy, polyurethane, alkyd, vinyl and chlorinated rubber

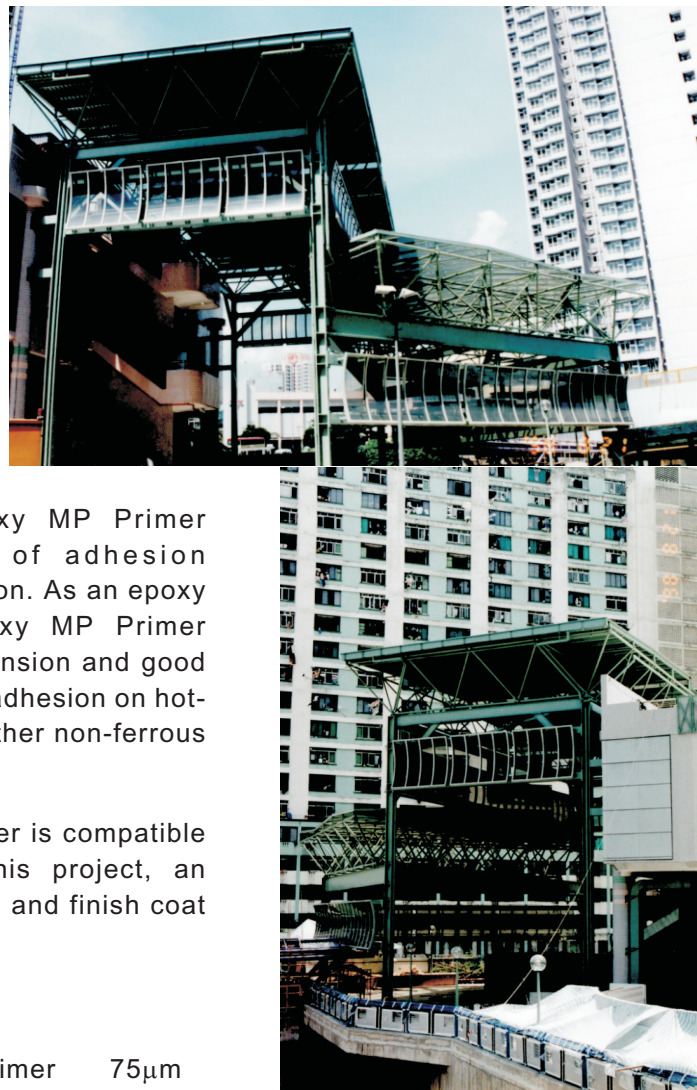

Housing Authority Space Frame Structure for Kwai Shing Estate Phase 2

Peacopoxy Multipurpose Primer was selected as a substitutes of Etch primer and epoxy primer on hot-dipped galvanized steel. Peacopoxy MP Primer combines both function of adhesion enhancement and anti-corrosion. As an epoxy polyamide primer, Peacopoxy MP Primer formulates with low surface tension and good wetting resin. It promotes the adhesion on hot-dipped galvanized steel and other non-ferrous metal.

Peacopoxy Multipurpose Primer is compatible to all kinds of finish. In this project, an economical alkyd intermediate and finish coat werespecified.

Coating System

Primer	Peacopoxy MP Primer	75μm
--------	---------------------	------

Noise Barrier Protection

Peacock Paint has been selected and approved by KCRC since 1996 for all Noise Mitigation Measures Projects

- Tai Po Market Station in 1996
- Fanling Station in 1997
- MongKok Station in 1998
- Tai Wai Station in 1999
- Sheung Shui Station in 1999
- Fo Tan Station in 1999-2000
- Chinese University Station in 1999-2000

Two Coats System

Peacopoxy Multi-Purpose Primer	50μm
Peacopour RC Finish	50μm

Peacopoxy Multi-Purpose Primer replaced and out performed the old fashioned T-wash and epoxy build coat on Galvanized Steel Surface. It can be applied up to 75 microns in single application.

Peacopour RC Finish is Acrylic Aliphatic Polyurethane Finish which has excellent color and gloss retention. The first application in Tai Po Market Station is still good condition.
